

He could barrel roll, loop de loop
 And climb up high then dive and swoop

He flew over mountains and trees
 Over the oceans and the seas

So many things Big Plane could do
 When he took to the sky so blue

Way up there in the clear blue sky
 A Big Plane flew up oh so high

With Big Plane wings, a Big Plane tail
 And Big Plane jet that VROOMED so well

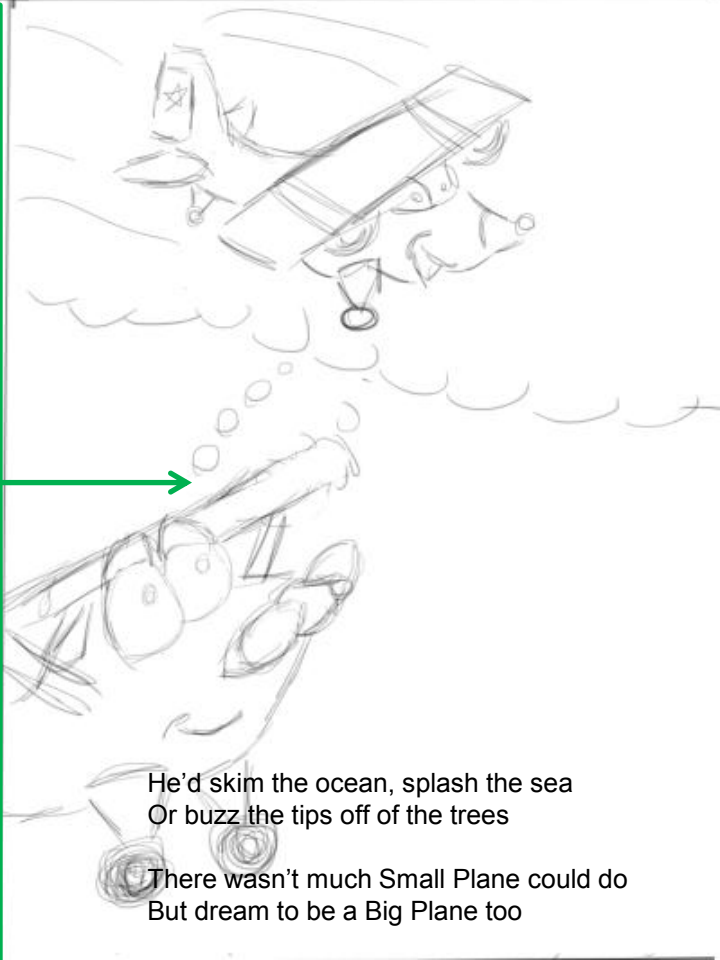

A little speck up in the sky
 Flew Small Plane, but not oh so high

With Small Plane wings, a Small Plane tail
 Small Plane's propeller BUZZED as well

He couldn't do a loop de loop
 And when he tried to dive and swoop

- Move this picture to next page.
 - Replace with picture of SP trying a loop or dive

He'd skim the ocean, splash the sea
 Or buzz the tips off of the trees

There wasn't much Small Plane could do
 But dream to be a Big Plane too

'Til one day at The Great Plane Show
Where planes had come from high and low

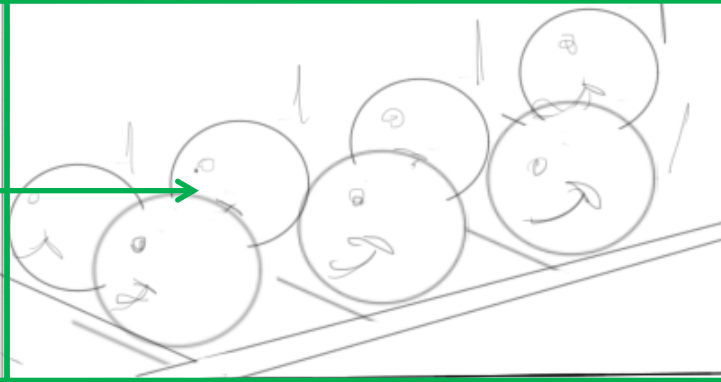

Fast Plane, Slow Plane, Short Plane and Tall
Of course Big Plane, best of them all!

They soared through the sky without flaw
Leaving the crowd gasping in awe

From the ground Small Plane watched them go
Oh how he loved for The Great Plane Show!

He watched as Big Plane led the bunch
Through loops and dips and spins and such

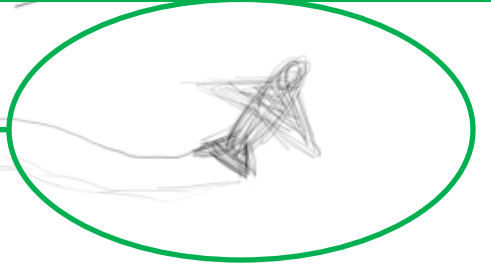

Can we flip these
two images? So
SM is on page 2
and crowd is on
page 1?

Then time for Big Plane's special show
All others landed down below

Big Plane alone up in the sky
Climbed and climbed and climbed oh so high

Everyone gathered round see
What Big Plane's special trick would be

- Let's keep all the planes on the ground (minus SP) watching and big plane in the air on page 1.
- Then the below conversation between Tall and Fast on page 2 with SP over hearing.

"Maybe a dive?" asked Tall of Fast,
"Then loop de loop in just one pass?"

"He's climbing high" said fast to tall
"TWO barrel rolls would shock us all!"

Small Plane had seen Big's tricks before
And couldn't wait to see some more!

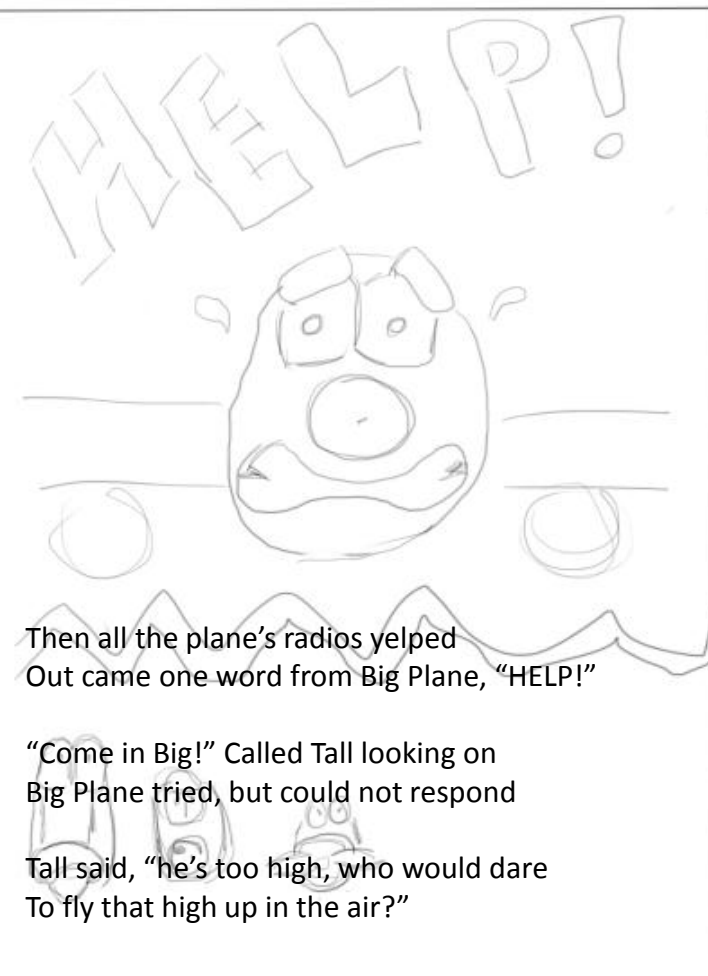

But from the ground just looking on
Small Plane could tell something was wrong

It wasn't Big Plane's wings or tail
His Big Plane jet vroomed not so well

Small Plane worried and wondered why
But he had never flown that high

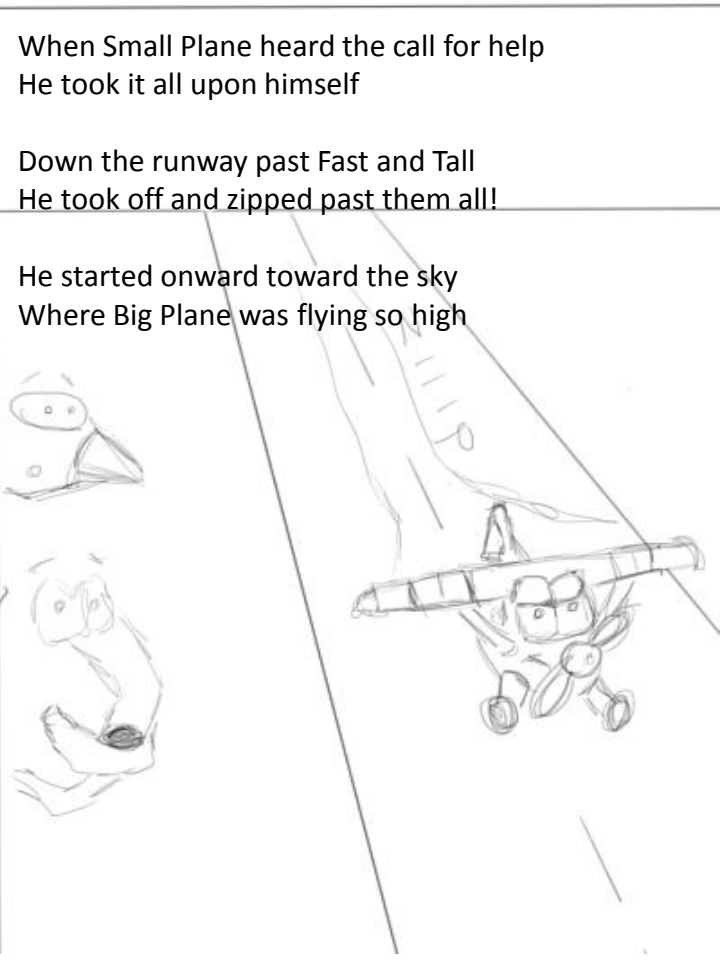

He was too small what could he do?
That Big Plane wasn't able to

Then all the plane's radios yelped
Out came one word from Big Plane, "HELP!"

"Come in Big!" Called Tall looking on
Big Plane tried, but could not respond

Tall said, "he's too high, who would dare
To fly that high up in the air?"

When Small Plane heard the call for help
He took it all upon himself

Down the runway past Fast and Tall
He took off and zipped past them all!

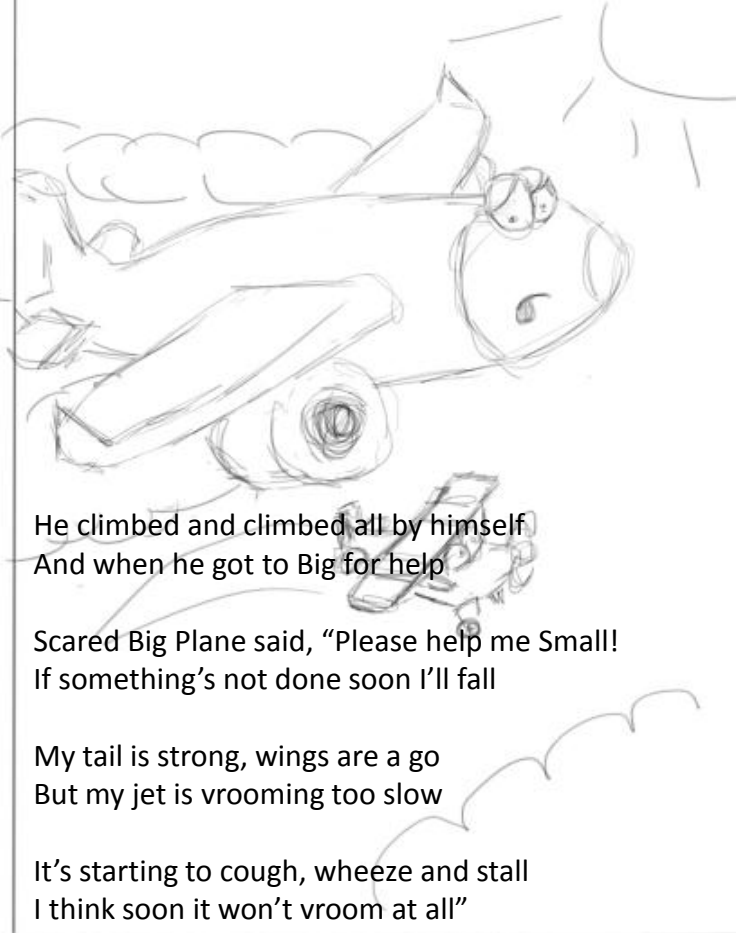

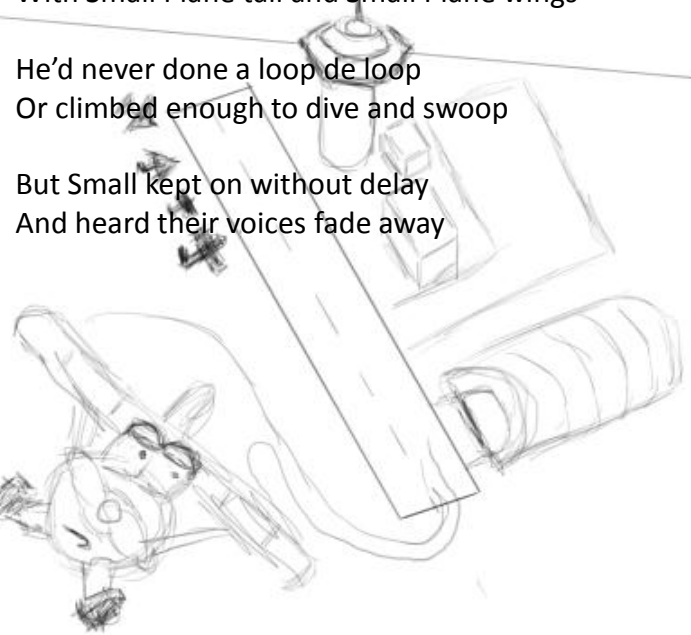

He started onward toward the sky
Where Big Plane was flying so high

As he climbed he heard others saying
He'd never make it to Big Plane

He was too small for trying things
With Small Plane tail and Small Plane wings

He'd never done a loop de loop
Or climbed enough to dive and swoop

But Small kept on without delay
And heard their voices fade away

He climbed and climbed all by himself
And when he got to Big for help

Scared Big Plane said, "Please help me Small!
If something's not done soon I'll fall

My tail is strong, wings are a go
But my jet is vrooming too slow

It's starting to cough, wheeze and stall
I think soon it won't vroom at all"

Small Plane said, "I know what to do
To bring down safe both me and you"

Small put Big on his wings in flight
Propelling them with all his might

When Big Plane's jet finally failed
Small said, "steer with your Big Plane tail

And fly us with your Big Plane wings
Guide us down to a safe landing"

Hurray!

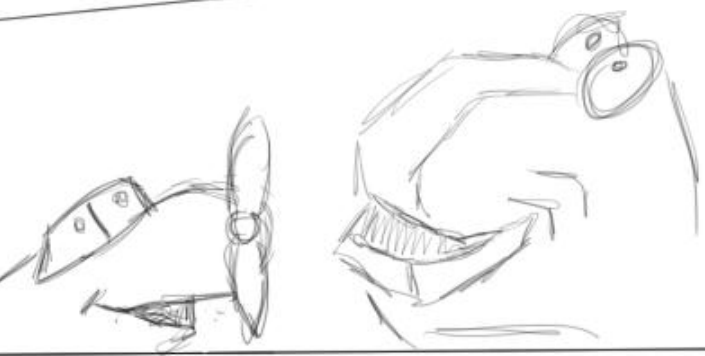

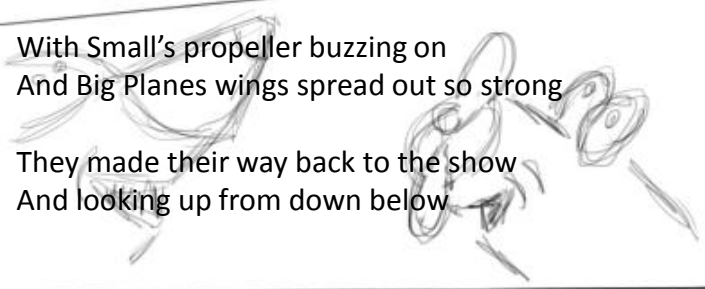

Were all the planes who watched amazed
By what they saw from Small that day

They cheered as Big and Small came down
And when they landed on the ground

With Small's propeller buzzing on
And Big Planes wings spread out so strong

They made their way back to the show
And looking up from down below

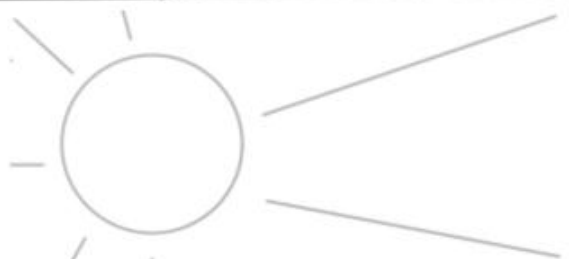

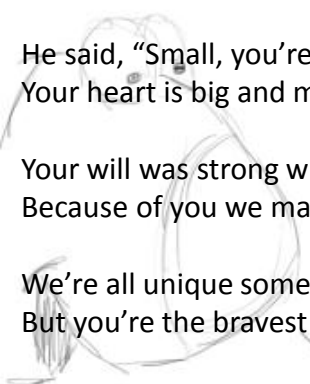

Big looked at Small and spoke out loud
In front of the planes and the crowd

He said, "Small, you're not small at all
Your heart is big and might is tall

Your will was strong when others feared
Because of you we made it here

We're all unique some big some tall
But you're the bravest of us all

Your mind is sharp, your courage strong
You'll be BRAVE plane from this day on"

Now with his Brave Plane wings and tail
And Brave propeller buzzing well

Brave plane flies at the great plane show
Helping those above and below

Crowds always cheer when he flies by
And tell of Brave Plane in the sky
